Notes to the Condensed Consolidated Interim Financial Statements

For the Three Months Ended February 29, 2020

(Unaudited – Expressed in Canadian Dollars)

1. NATURE OF OPERATIONS

Pacton Gold Inc. (the “Company” or “Pacton”) was incorporated pursuant to the British Columbia *Business Corporations Act* on December 15, 2010. The address of the Company's corporate office and its principal place of business is 1680 – 200 Burrard Street, Vancouver, British Columbia, Canada, V6C 3L6. The Company's registered and records office is 400 – 725 Granville Street, Vancouver, British Columbia, Canada, V7Y 1G5. The Company operates in Canada and Australia. On July 17, 2012, the Company's stock was listed on the TSX Venture Exchange (“TSX-V”) trading under the symbol “NX”. On April 27, 2017, the Company changed its name to Pacton Gold Inc. and began trading under the symbol “PAC”. The Company's shares also trade on the OTC Exchange in the United States under the symbol “PACXF” and on the Frankfurt Stock Exchange under the symbol “2NKN”. The principal business of the Company is the identification, evaluation and acquisition of mineral properties, as well as exploration of mineral properties once acquired. The Company is an exploration stage company and is in the process of acquiring and exploring its mineral property interests.

2. GOING CONCERN

These condensed consolidated interim financial statements (the “financial statements”) have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations.

The Company has incurred a loss during the three months ended February 29, 2020 of \$679,316 (2019 - \$597,594) and as at February 29, 2020 has a deficit of \$26,630,025 (November 30, 2019 - \$25,950,709), has limited resources, no sources of operating cash flow and no assurances that sufficient funding will be available to continue operations for an extended period of time. The Company is in the exploration stage, and accordingly, has not yet commenced revenue-producing operations.

Subsequent to February 29, 2020, there was a global outbreak of coronavirus (COVID-19). The actual and threatened spread of the virus globally has had a material adverse effect on the global economy and, specifically, the regional economies in which the Company operates. The pandemic could continue to have a negative impact on the stock market, including trading prices of the Company's shares and its ability to raise new capital. These factors, among others, could have a significant impact on the Company's operations.

These material uncertainties may cast significant doubt upon the Company's ability to continue as a going concern.

The application of the going concern concept is dependent upon the Company's ability to satisfy its liabilities as they become due and to obtain the necessary financing to complete the exploration and development of its mineral property interests, the attainment of profitable mining operations or the receipt of proceeds from the disposition of its mineral property interests. Management is actively engaged in the review and due diligence on opportunities of merit in the mining sector and is seeking to raise the necessary capital to meet its funding requirements. There can be no assurance that management's plan will be successful.

If the going concern assumption were not appropriate for these financial statements then adjustments may be necessary in the carrying values of assets and liabilities, the reported expenses and the statement of financial position classifications used. Such adjustments could be material.

3. BASIS OF PREPARATION

a) Statement of compliance

The condensed consolidated interim financial statements of the Company have been prepared in accordance with International Accounting Standard (“IAS”) 34 *Interim Financial Reporting*.

The condensed consolidated interim financial statements of the Company should be read in conjunction with the Company’s 2019 annual consolidated financial statements that have been prepared in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board.

These financial statements were reviewed by the Audit Committee and approved and authorized for issue by the Board of Directors on April 22, 2020.

b) Basis of measurement

These financial statements have been prepared under the historical cost basis, except for certain financial instruments, which are measured at fair value, as explained in the significant accounting policies (note 4). These financial statements have been prepared under the accrual basis of accounting, except for cash flow information.

c) Subsidiaries

These financial statements include all subsidiaries in the accounts of the Company for the periods presented. These subsidiaries are listed as follows:

Subsidiary	Ownership February 29, 2020	Ownership November 30, 2019	Incorporated	Nature
Pacton Pilbara Pty. Ltd. (“Pacton Pilbara”)	100%	100%	Australia	Mineral exploration
CTTR Gold Pty. Ltd. (“CTTR”)	100%	100%	Australia	Mineral exploration
Drummond East Pty. Ltd. (“Drummond East”)	100%	100%	Australia	Mineral exploration
Arrow (Pilbara) Pty. Ltd. (“Arrow Pilbara”)	100%	100%	Australia	Mineral exploration

Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The financial statements of subsidiaries are included in the financial statements from the date that control commences until the date that control ceases. All significant intercompany transactions and balances have been eliminated.

4. SIGNIFICANT ACCOUNTING POLICIES

The condensed consolidated interim financial statements have been prepared, for all periods presented, following the same accounting policies and methods of computation as described in note 4 to the audited consolidated financial statements for the year ended November 30, 2019, except for the following.

PACTON GOLD INC.

Notes to the Condensed Consolidated Interim Financial Statements
For the Three Months Ended February 29, 2020
(Unaudited – Expressed in Canadian Dollars)

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

- a) New accounting standard adopted during the period

IFRS 16 Leases

Initial adoption

On December 1, 2019, the Company adopted IFRS 16, which specifies how an IFRS reporter will recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is twelve months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17 *Leases*. The standard was issued in January 2016 and is effective for annual periods beginning on or after January 1, 2019.

The Company has elected to apply IFRS 16 using a modified retrospective approach, which does not require restatement of prior period financial information. Modified retrospective application recognizes the cumulative effect of IFRS 16 as an adjustment to opening deficit at December 1, 2019 and applies the standard prospectively. The Company has determined that at December 1, 2019, adoption of IFRS 16 will not result in the recognition of a right-of-use ("ROU") asset nor a lease obligation.

Ongoing recognition and measurement

On the date that the leased asset becomes available for use, the Company recognizes a ROU asset and a corresponding lease obligation. Interest expense associated with the lease obligation is charged to the statement of income/loss over the lease period with a corresponding increase to the lease obligation. The lease obligation is reduced as payments are made against the principal portion of the lease. The ROU asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. Depreciation of the ROU asset is recognized in depreciation expense.

- b) New accounting standards issued but not yet effective

IFRS 3 Business Combinations

IFRS 3 has been amended to revise the definition of a business to include an input and a substantive process that together significantly contribute to the ability to create outputs. The amendment to IFRS 3 is effective for the years beginning on or after January 1, 2020. The amendment to IFRS 3 is expected to have no impact for the Company.

IAS 1 Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors

IAS 1 and IAS 8 have been amended to use a consistent definition of materiality throughout IFRS and the Conceptual Framework for Financial Reporting; clarify the explanation of the definition of material; and incorporate guidance in IAS 1 regarding immaterial information. The amendments to IAS 1 and IAS 8 are effective for the years beginning on or after January 1, 2020. These amendments are expected to have no impact for the Company.

PACTON GOLD INC.

Notes to the Condensed Consolidated Interim Financial Statements
For the Three Months Ended February 29, 2020
(Unaudited – Expressed in Canadian Dollars)

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income or loss in the year of the change, if the change affects that year only, or in the year of the change and future years, if the change affects both.

Critical judgments in applying accounting policies

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the financial statements within the next financial year are discussed below.

a) Impairment of exploration and evaluation assets

The application of the Company's accounting policy for exploration and evaluation expenditures and impairment of the capitalized expenditures requires judgment in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Estimates and assumptions made may change if new information becomes available. If, after expenditure is capitalized, information becomes available suggesting that the recovery of expenditure is unlikely, the amount capitalized is written off in profit or loss in the year the new information becomes available.

b) Title to mineral property interests

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

c) Income taxes

Significant judgment is required in determining the provision for income taxes. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Company recognizes liabilities and contingencies for anticipated tax audit issues based on the Company's current understanding of the tax law. For matters where it is probable that an adjustment will be made, the Company records its best estimate of the tax liability, including the related interest and penalties in the current tax provision. Management believes they have adequately provided for the probable outcome of these matters; however, the final outcome may result in a materially different outcome than the amount included in the tax liabilities.

In addition, the Company recognizes deferred tax assets relating to tax losses carried forward to the extent that it is probable that taxable profit will be available against which a deductible temporary difference can be utilized. This is deemed to be the case when there are sufficient taxable temporary differences relating to the same taxation authority and the same taxable entity that are expected to reverse in the same year as the expected reversal of the deductible temporary difference, or in years into which a tax loss arising from the deferred tax asset can be carried back or forward. However, utilization of the tax losses also depends on the ability of the taxable entity to satisfy certain tests at the time the losses are recouped.

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

Critical judgments in applying accounting policies (continued)

d) Going concern

The assessment of the Company's ability to continue as a going concern requires significant judgment. The financial statements have been prepared on the basis of accounting principles applicable to a going concern, as disclosed in note 2.

e) Acquisition of subsidiaries

The Company's acquisitions of CTTR, Drummond East and Arrow Pilbara during the year ended November 30, 2018 have been determined to be asset acquisitions, as CTTR, Drummond East and Arrow Pilbara do not meet the definition of a business under IFRS 3. As a result, the acquisitions have been accounted for as asset acquisitions, whereby all of the assets acquired and liabilities assumed are assigned a carrying amount based on relative fair values. The Company's application of the recognition principle may result in recognizing some assets (often intangible) and liabilities that the acquiree had not previously recognized as assets and liabilities in its financial statements, which require management judgment.

Key sources of estimation uncertainty

The following are key assumptions concerning the future and other key sources of estimation uncertainty that have a significant risk of resulting in material adjustments to the financial statements.

a) Decommissioning liabilities

Rehabilitation provisions have been created based on the Company's internal estimates. Assumptions, based on the current economic environment, have been made, which management believes are a reasonable basis upon which to estimate the future liability. These estimates take into account any material changes to the assumptions that occur when reviewed regularly by management. Estimates are reviewed annually and are based on current regulatory requirements. Significant changes in estimates of contamination, restoration standards and techniques will result in changes to provisions from year to year. Actual rehabilitation costs will ultimately depend on future market prices for the rehabilitation costs that will reflect the market condition at the time the rehabilitation costs are actually incurred. The final cost of the currently recognized rehabilitation provisions may be higher or lower than currently provided for. As at February 29, 2020, the Company had no known rehabilitation requirements, and accordingly, no provision has been made.

b) Fair value of stock options granted

The Company uses the Black-Scholes option pricing model to value the stock options granted during the year. The Black-Scholes model was developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable. The model requires management to make estimates that are subjective and may not be representative of actual results. Changes in assumptions can materially affect estimates of fair values.

6. FINANCIAL INSTRUMENTS

Financial instruments are agreements between two parties that result in promises to pay or receive cash or equity instruments. The Company classifies its financial instruments as follows: cash and cash equivalents is classified as fair value through profit or loss; receivables, as amortized cost; and accounts payable and accrued liabilities, as amortized cost. The carrying values of these instruments approximate their fair values due to their short term to maturity.

The following table sets forth the Company's financial asset measured at fair value by level within the fair value hierarchy:

February 29, 2020	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$ 3,702,105	\$ -	\$ -	\$ 3,702,105

November 30, 2019	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$ 905,356	\$ -	\$ -	\$ 905,356

The Company has exposure to the following risks from its use of financial instruments:

- Credit risk;
- Liquidity risk; and
- Market risk.

a) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Company manages credit risk, in respect of cash, by placing it at major Canadian financial institutions. Included in receivables is \$181,340 (November 30, 2019 - \$125,293) owing from the Canada Revenue Agency and the Australian Taxation Office. The Company has minimal credit risk.

b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquid funds to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. The contractual financial liabilities of the Company as of February 29, 2020 equal \$400,402 (November 30, 2019 - \$491,992). All of the liabilities presented as accounts payable and accrued liabilities are due within 30 days of February 29, 2020.

c) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates, will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposure within acceptable parameters, while optimizing the return on capital.

Notes to the Condensed Consolidated Interim Financial Statements
For the Three Months Ended February 29, 2020
(Unaudited – Expressed in Canadian Dollars)

6. FINANCIAL INSTRUMENTS (Continued)

c) Market risk (continued)

- i) Currency risk* – Currency risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in foreign exchange rates. The Company has operations in Canada and Australia and incurs operating and exploration expenditures in both currencies. The fluctuation of the Canadian dollar in relation to the Australian dollar (“AUD”) will have an impact upon the results of the Company. The Company does not hold substantial funds in a foreign currency, and only a small amount of its accounts payable and accrued liabilities is denominated in Australian dollars. A fluctuation in the exchanges rates between the Canadian and Australian dollars of 10% would result in a \$6,800 change in the Company’s cash, \$2,000 change in accounts payable and accrued liabilities and \$2,900 change in other comprehensive income (loss). The Company does not use any techniques to mitigate currency risk.
- ii) Interest rate risk* – Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. Interest earned on cash is at nominal interest rates, and therefore, the Company does not consider interest rate risk to be significant. The Company has no interest-bearing financial liabilities.
- iii) Other price risk* – Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk. The Company is not exposed to significant other price risk.

d) Capital management

The Company considers its capital to be comprised of shareholders’ equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares. Although the Company has been successful at raising funds in the past through the issuance of capital stock, it is uncertain whether it will continue this method of financing due to the current difficult market conditions.

In order to facilitate the management of its capital requirements, the Company prepares expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions.

Management reviews the capital structure on a regular basis to ensure that the above objectives are met. There have been no changes to the Company’s approach to capital management during the three months ended February 29, 2020. The Company is not subject to externally imposed capital requirements.

a) Pilbara Project

CTTR

On March 20, 2018, the Company entered into a share purchase agreement to acquire 100% of the issued and outstanding shares of CTTR, an Australian proprietary limited company. CTTR holds applications to nine tenement licenses for a mineral property group in the Pilbara Region of Western Australia.

Under the terms of the share purchase agreement, the Company acquired 100% of the issued and outstanding shares of CTTR by:

- Paying a \$25,000 non-refundable deposit (paid);
- Paying \$75,000 (paid) and issuing 916,666 common shares (issued and valued at \$238,333) of the Company and 458,333 share purchase warrants (issued and valued at \$64,545). Each warrant is exercisable into one additional common share of the Company for a period of 18 months from the date of issue at a price of \$0.45, upon acceptance of the transaction by the TSX-V (issued on March 29, 2018); and
- Paying \$50,000 (paid) and issuing 416,666 common shares (issued and valued at \$270,833) of the Company and 208,333 share purchase warrants (issued and valued at \$72,034). Each warrant is exercisable into one additional common share of the Company for a period of 18 months from the date of issue at a price of \$0.97.

CTTR (continued)

The Company also issued 156,250 common shares valued at \$40,625 as a finder's fee on the transaction.

The acquisition of CTTR has been accounted for as an acquisition of assets and liabilities, as CTTR does not meet the definition of a business under IFRS 3. The acquisition of the net assets of CTTR was recorded at the fair value of the consideration transferred of \$836,370, as detailed above. The net assets acquired consisted entirely of exploration and evaluation assets.

On January 6, 2020, the Company surrendered all tenement licenses, which resulted in an impairment charge of \$832,177 for the year ended November 30, 2019.

Arrow Pilbara

On May 11, 2018, the Company entered into a share purchase and option agreement whereby the Company could earn up to an 80% interest in Arrow Pilbara, an Australian proprietary limited exploration company. Arrow Pilbara holds two granted tenement licenses and two applications for licenses in the Pilbara Region of Western Australia.

Under the terms of the agreement, the Company was required to make cash payments and issue common shares and common share purchase warrants of the Company to acquire a 51% interest in Arrow Pilbara as follows:

- Issue 1,086,957 common shares (issued and valued at \$695,652) and 1,086,957 common share purchase warrants (issued and valued at \$583,761) exercisable into one share at \$0.35 for three years and pay \$500,000 (paid \$400,000), with remaining due upon grant of application. On January 7, 2020, the outstanding \$100,000 payment was renegotiated down to AUD \$50,000 and paid.

To acquire a further 29% interest in Arrow Pilbara, the Company was required to:

- Pay \$250,000 or an equivalent number of common shares based on the five-day trailing volume-weighted average price at the time of issue, subject to a floor price of no lower than \$0.19 per common share; and
- Fund exploration expenditures up to a maximum of \$500,000.

The vendor retains a right to explore for, mine and extract lithium, caesium and tantalum from the property.

A discovery bonus of \$500,000 cash is payable if the Company reports a National Instrument ("NI") 43-101-defined "measured mineral resource" or "inferred mineral resource" of at least 100,000 ounces of gold on the property.

The Company also issued 227,941 common shares valued at \$58,125 as a finder's fee on the transaction.

Arrow Pilbara (continued)

The acquisition of 51% of Arrow Pilbara has been accounted for as an acquisition of assets and liabilities, as Arrow Pilbara does not meet the definition of a business under IFRS 3. The acquisition of the net assets of Arrow Pilbara was recorded at the fair value of the consideration transferred of \$1,637,538, as detailed above. The net assets acquired were as follows:

Net Assets Acquired	
Exploration and evaluation assets	\$ 3,210,860
Non-controlling interest	(1,573,322)
	\$ 1,637,538

On August 20, 2018, the Company entered into a share purchase agreement to acquire the remaining ownership interest in Arrow Pilbara. Under the terms of the agreement, the Company acquired the remaining 49% ownership interest in Arrow Pilbara by paying \$1,000,000 (paid) and issuing 2,000,000 common shares (issued and valued at \$820,000).

The purchase of the remaining 49% interest was accounted for as follows:

Acquisition of 49% Interest	
Additional consideration paid	\$ 1,820,000
Elimination of non-controlling interest	(1,573,322)
Loss on acquisition	\$ 246,678

On January 6, 2020, the Company surrendered two tenement licenses, which resulted in an impairment charge of \$636,906 for the year ended November 30, 2019.

Drummond East

On August 15, 2018, the Company entered into a share purchase agreement to acquire a 100% interest in Drummond East, an arm's length Australian exploration company wholly owned by Impact Minerals Ltd. ("Impact"). Drummond East holds seven granted tenement licenses in the Pilbara Region of Western Australia.

Under the terms of the agreement, the Company paid Impact a total of \$350,000 and issued to Impact 2,125,000 common shares of the Company valued at \$860,625.

In addition, the Company will pay a bonus to Impact of \$500,000 if the Company publishes measured, indicated or inferred gold resources of more than 250,000 ounces on the property. The Company will grant Impact a 2% net smelter return royalty ("NSR") in respect of the property on standard industry terms to be agreed between the parties. The parties agree that the Company shall, at all times, retain an exclusive and unlimited right to purchase back 50% of the NSR from Impact for \$500,000.

b) Red Lake Project (continued)

On October 22, 2019, the Company entered into an option agreement to acquire a 100% interest in additional mineral claims in the Red Lake Mining District, located in Ontario. Under the terms of the agreement, the Company must make cash payments and issue common shares of the Company as follows:

- Pay \$35,000 (paid) and issue 150,000 common shares of the Company within five days of approval by the TSX-V, which was received November 6, 2019 (issued on November 15, 2019 and valued at \$16,500);
- Pay \$22,500 and issue 150,000 common shares of the Company on or before November 6, 2020;
- Pay \$22,500 and issue 150,000 common shares of the Company on or before November 6, 2021;
- Pay \$22,500 and issue 150,000 common shares of the Company on or before November 6, 2022; and
- Pay \$22,500 and issue 150,000 common shares of the Company on or before November 6, 2023.

The claims are subject to a 0.25% to 2.25% NSR, of which one-half may be repurchased by the Company for \$1,000,000.

c) Tully West Gold Property

On January 16, 2017, the Company entered into an option agreement to earn a 100% interest in the Tully West Gold Property, located in Ontario. On January 18, 2018, certain terms were amended. Under the terms of the amended agreement, the Company must make cash payments and issue common shares of the Company as follows:

- Issue 1,300,000 common shares of the Company (issued on January 25, 2017 and valued at \$117,000) and pay \$25,000 (paid) within five days of approval by the TSX-V, which was received January 25, 2017;
- Issue 1,300,000 common shares of the Company on or before January 25, 2018 (issued on January 25, 2018 and valued at \$390,000);
- Pay \$80,000 on or before February 15, 2018 (paid); and
- Issue 1,300,000 common shares of the Company (issued on July 24, 2018 and valued at \$793,000) and pay \$110,000 (paid) on or before January 25, 2019.

The Company completed an equity financing for gross proceeds in excess of \$1,000,000 (excluding flow-through proceeds), thus the January 25, 2019 common share and cash payments were accelerated.

On December 12, 2018, the agreement was amended to extend the exploration expenditure deadlines. The Company was required to pay an additional \$10,000 on or before January 12, 2019 (paid).

The Company must now incur exploration expenditures as follows:

- \$250,000 on or before January 16, 2018 (incurred);
- An additional \$500,000 on or before January 25, 2020; and
- An additional \$500,000 on or before January 25, 2021.

The vendors retain a 2.5% NSR, of which two-fifths (1%) can be repurchased by the Company for an aggregate \$1,000,000.

The Company did not incur the required exploration expenditures on the Tully West Gold Property by January 25, 2020. Accordingly, the Company recorded an impairment charge of \$2,246,986 at November 30, 2019.
